Covestro

Brief description of the company

Make an impact globally, working locally. Why not? Become #1ofUs

We are made up of 300 passionate people dedicated to doing their best work and driving success for our business partners. Our diverse team of 16 nationalities speaking 25 languages together with global functions creates innovative, integrated business solutions across the world.

In our Global Business Center, we combine curiosity and courage to live our mission: to make the world a brighter place. To achieve that, Covestro Slovakia will implement the long-term strategy to become “Fully Circular”. These are the values we live, shaping our working environment and the way we cooperate – as colorful as we are.

We value the opinion of our colleagues. We ask them regularly what they appreciate the most within the company. It is the TEAM and people they are working with, the trustful and supportive environment, and also the flexible working hours.

Ready to bring your insights and imagination to Covestro?

Job description, responsibilities and duties**WHAT WE OFFER**

IT Architect (m/f/d) Demand-to-Supply

Our CFO (Chief Financial Officer) function manages the economic processes of our company. It is also responsible for legal questions and provides IT solutions for the entire Group. Responsibility for the operation, optimization and further development of applications is bundled in the IT Application Services department.

As part of the Demand-to-Supply team, you will work with business unit contacts to develop solutions for production and logistics processes and product lifecycle management.

The basis for this is a global SAP ERP system. You will take care of the following tasks:

- You will be the internal consultant (m/f/d) in regards to technology areas and process optimization
- It's your task to design the architecture of the company's IT landscape which includes data,

application and technology

- You will drive the system consolidation and data integration as well as the standardization of technologies and solutions
- In addition, you will map and consolidate business requirements into a suitable design of IT solutions or services
- Within DevOps teams you will take active roles in, pre-projects, projects or solution enhancements
- It's up to you to ensure adherence to operation guidelines and compliance to standards
- Within your work area you follow and contribute to continuous improvement processes
- You will lead subprojects with a functional responsibility

Required education level

You have a successful university degree in Information Technology or an equivalent qualification with profound experience IT Architect

Required skills & experience

WHAT YOU OFFER

- You have sound experience in implementation processes in SAP (modules like MM, WM, PP/PPPI, QM, PLM)
- We look forward to your project management experience with agile methodologies such as SCRUM
- Personally, you have effective interpersonal skills, out-of-the-box thinking and the ability to collaborate with all levels of employees
- You should also have the ability to cope under pressure and with ambiguous situations
- Your intercultural experience and very good German and English skills complete your profile

Salary range

minimum 2.800 EUR gross/monthly

Position suitable for non-Slovak speaker
