

**Name of the company**

Covestro (Slovakia) Services, s.r.o.

Brief description of the company

Make an impact globally, working locally. Why not? Become #1ofUs

We are made up of 300 passionate people dedicated to doing their best work and driving success for our business partners. Our diverse team of 16 nationalities speaking 25 languages together with global functions creates innovative, integrated business solutions across the world.

In our Global Business Center, we combine curiosity and courage to live our mission: to make the world a brighter place. To achieve that, Covestro Slovakia will implement the long-term strategy to become “Fully Circular”. These are the values we live, shaping our working environment and the way we cooperate – as colourful as we are.

We value the opinion of our colleagues. We ask them regularly what they appreciate the most within the company. It is the TEAM and people they are working with, the trustful and supportive environment, and the flexible working hours.

Job description, responsibilities and duties

IT Architect (m/f/d) SAP Transportation Management (SAP TM)

WHAT WE OFFER

The CFO (Chief Financial Officer) Community manages Covestro’s financial processes. It is also responsible for providing legal services and IT solutions to the company.

You would like to become a member of our agile Covestro IT team and help realize our digitalization plans as well as ensure best IT solutions for our business processes? Then you are right with us!

- In your new position you will ensure the system integrity and stability of applications in the area of Transport Management (control program code and all its relations within SAP TM but also to connected systems).
- The assessment of requirements from the business regarding their technical feasibility and their suitability in relation to our IT strategy will also be part of your new tasks.

- You will be implementing requirements by creating the needed program code.
- You will advise on technologies and process optimization potentials.
- Furthermore, you will design the company's IT architecture in terms of data, application and technology and drive system consolidations and data integration as well as the standardization of technologies and solutions
- You will deal with market solutions and trends as well as the introduction of new technologies based on business requirements and share this knowledge with your environment
- You will be responsible for representing and consolidating business requirements in a defined design of IT solutions or services and live an active role in DevOps teams
- In addition, you will foster a culture that prioritizes continuous improvement and the necessary flexibility (Covestro's C3 values)

Required education level

You have a university degree (Master) in computer science or comparable education.

Required skills & experience

- You can demonstrate profound experience in SAP TM used technologies and possess functional and business process knowledge in that area
- You are experienced in ABAP coding or similar programming languages and desire to keep doing that
- You are able to solve problems in a structured and methodical way
- You are experienced in working in flexible and agile teams, have outstanding analytical and strategic skills and can communicate and interact professionally with internal and external colleagues (m/f/d) of diverse cultures
- Business fluent English skills, both written and spoken, round out your profile

Salary range

minimum 2800 EUR gross/month

Position suitable for non-Slovak speaker

Yes
