Job description, responsibilities and duties

Backend Developer

Amelia, an IPsoft Company is a disruptive technology company, pioneering innovation in the development and delivery of autonomic and cognitive technologies.

More about us: amelia.ai

In Košice, we are responsible for engineering and technical support of various infrastructure platforms for our customers and partners which we manage with our own automation software. Possible remote work or work from office.

Job opportunity:

We are looking for an experienced Back-end developer to join our IT team. You will be focusing on development and continual improvement of artificial intelligence platform, its backend processes and other dependencies , ensuring seamless experience for the end user.

If you have good programming skills and a passion for developing applications or improving existing ones, we would like to meet you.

Ultimately, you should be able to develop and maintain operational and durable platform components to meet our company's needs.

Responsibilities

- Designing and implementing software using Java
- Ensuring the code quality by implementing unit, integration and end-to-end tests
- Optimising application for maximum performance
- Working with DevOps related activities (CI/CD, infrastructure, etc.)
- Working in a distributed team and cooperate with other teams on cross-team deliveries
- Troubleshooting, analysing, and solving integration and production issues

Skills

- 5+ years of professional Java software development experience
- Strong knowledge of Java. Strong system design skills and programming skills
- Experience with Spring Framework, Spring Boot, REST, CI and Scrum
- Familiarity with common algorithms, data structures and multithreading
- Familiarity with Git/Gradle, Docker, Kubernetes, Continuous Delivery and DevOps
- Experience with RDBMS (MySQL, etc.) and NoSQL (Apache Cassandra, etc.) databases
- Comfortable with making technical and architectural decisions autonomously
- Communicative, able to explain concepts well to both tech and non-tech

Required education level

Secondary with school-leaving examination University education (Bachelor's degree) University education (Master's degree) Postgraduate (Doctorate)

Required skills & experience
